Karachi, Sindh - 75290, Pakistan

SUMMARY

Mobile App Developer & DevOps Engineer with experience building React Native apps and managing cloud infrastructure. Delivered features to FameWheels (10k+ installs) and implemented CI/CD pipelines with Docker and Terraform, Kubernetes, Jenkins, and automation scripting.

EXPERIENCE

- DevOps Engineer** March 2025 - June 2025
TeResol [<https://www.teresol.com/>] Karachi, Pakistan
 - Managed 100+ Kubernetes nodes hosting 2,500+ microservices with HA multi-master architecture and Istio.
 - Deployed EFK, Prometheus and Grafana to enable centralized logging and real-time infrastructure monitoring.
 - Developed a DevOps Portal for multi-environment deployment validation, YAML diffing, and service visibility.
- Associate Software Engineer** October 2025 - Present
Devsynth Innovations [<https://devsynth-innovations.com/>] Karachi, Pakistan
 - Build and manages Dockerized workloads on AWS EC2 and ECS with Terraform, boosting deployment by 40%.
 - Implemented Jenkins CI/CD pipelines with GitHub, SonarQube, and Trivy, cutting manual deployment by 80%.
 - Developed React Native mobile applications, enhancing UI responsiveness and user experience by 40%.
- Mobile Application Developer Internee (React Native)** March 2025 - June 2025
Famewheels [<https://www.famewheels.com/>] Karachi, Pakistan
 - Integrated AWS media stack (S3 + CloudFront) and supported EC2 backend traffic handling.
 - Supported a production app with 10k+ installs and 3k daily active users; delivered weekly releases via RevoPush.
 - Built 25+ cross-platform screens (search, listing, detail, checkout and more); these flows reached 90% of active users.

PROJECTS

- My Story Teller Android Application (Java)** July 2024 – Present
Tools: Android Studio, SQLite, Android TTS API, GitHub [[🔗](#)]
 - Built role-based Android app (Admin / User) with full CRUD using SQLite.
 - Added TTS “Speak” feature to improve accessibility for low-vision users.
- Car Rental Mobile Application (Java, Firebase)** May 2024 – Present
Tools: Android Studio, GitHub [[🔗](#)]
 - Developed an Android app for car rentals with separate admin and user roles.
 - Admins can add, update, and delete cars, while users can browse and book vehicles.
 - Used Firebase Authentication for secure login and real-time database updates.
- Chatting Mobile Application (React Native, Firebase)** Jan 2025 – Present
Tools: Visual Studio Code, Node.js, Firebase [[🔗](#)]
 - Built a cross-platform real-time chat app with React Native (Expo) using Firebase.
 - Integrated media sharing via Cloudinary and WebRTC calling with Firestore signaling for peer connections.
 - Implemented Expo push notifications, and EAS-ready config for native builds—boosting UX and deployability.
- MERN Contacts App (Docker + Jenkins CI/CD)** October 2025 – Present
Tools: MongoDB, Express.js, React.js, Node.js, Docker, Docker Compose, Jenkins, GitHub Webhooks [[🔗](#)]
 - Developed a full-stack contact management app, enabling users to securely manage personal contacts.

SKILLS

- Mobile / Frontend:** React Native, Android (Java), TypeScript, ES6+, React Navigation, Context API
- Backend / APIs:** Node.js, Express.js, Spring Boot, RESTful APIs, JWT Authentication
- Databases:** SQLite, MySQL, MongoDB, Firebase
- DevOps / Testing:** Git, GitHub Actions, Jenkins, Docker, AWS, Jest, React Native Testing Library
- Other:** Angular, C, Python, C++

EDUCATION

- Bachelor of Science in Computer Science** February 2022 - January 2026
Muhammad Ali Jinnah University

CERTIFICATIONS

- Android Application Development React.js Node.js Git GitHub
- HTML, CSS Scrum Foundation Professional Certificate (SFPC)
